## About me

---

In terms of hobbies, I enjoy gaming, drawing, story writing, poetry, and any excuse to do decorative crafts.

My main form of entertainment is learning more and more about more subjects, I love long video essays about social issues, media, and whatever other topic catches my attention. I'm also interested in sciences, mainly biology, be prepared for a lot of random facts.

I love long discussions about anything under the sun, I can be really quiet at times but when I have something to say it's hard to make me shut up. I would say I'm fairly entertaining to talk to, my "stand-up routine" is neverending.
